WELCOME TO THE RADIUS 360° PRODUCT CATALOG

At Safe Harbor Health, we are proud to introduce the Radius 360 Program comprehensive, ACA, ERISA, and IRS Sections 125/105 compliant Automated Personal Health Monitoring Plan. Offered as a standalone voluntary benefit through group employers, Radius 360 empowers employees with a wide range of innovative digital healthcare tools and services to help them stay connected to their health like never before.

The Radius 360 Plan consolidates all member tools and services into a single, user-friendly platform, enabling participants to quickly access answers and services for their healthcare needs. We believe that by providing members with better access to their healthcare data, they can make more informed decisions that lead to tangible savings and improved overall well-being. In fact, the services offered through Radius 360 can help members save thousands of dollars per year on healthcare expenses, without requiring any changes to their existing coverage.

Additionally, our platform is designed to enhance members' quality of life, supporting their physical, mental, and financial health while improving morale and fostering a healthier workplace environment.

MEMBERS CAN ACCESS THEIR BENEFITS SECURELY VIA OUR APP.

Members can access their benefits securely via our app. This catalog provides detailed insights into the tools and services available on the Radius 360 platform. If you have any questions, we encourage you to contact our team:

We look forward to helping you and your team achieve better health, greater savings, and a stronger sense of well-being. Welcome to Radius 360, your gateway to smarter healthcare!

PRODUCT DESCRIPTIONS

Base Health Assessment

Participation in the Radius 360 Program begins with completing a **Base Health Assessment**—a structured and comprehensive screening tool designed to identify key areas of physical and mental health needs. This assessment, modeled after tools used in primary care, is essential for your initial enrollment and provides valuable insights into your overall well-being.

The topics covered in the assessment range from physical health metrics to emotional wellness, helping you and your healthcare providers recognize areas for improvement. Results can be securely shared with your medical professionals or trusted family members. Most importantly, the answers you provide will be used to personalize your Radius 360 experience, ensuring you receive the most relevant tools and support for your health journey.

Customized Plan for Wellness

Your health journey is unique, which is why the Radius 360 Program provides you with a **Customized Plan for Wellness**. Based on the results of your Health Assessment, this tailored plan offers actionable insights into your emotional and physical well-being, along with practical strategies to improve your overall health.

The Plan for Wellness evaluates key areas such as **Lifestyle, Physical Activity, Nutrition, Sleep, Emotional Wellness**, and more than **20 Vital Health Metrics**. Additionally, it integrates access to **Cognitive Behavioral Therapies (CBTs)** to help you develop and reinforce positive behaviors and habits. With this tool, you will gain a deeper understanding of your health and have the resources to make meaningful, lasting changes.

Mental Health Counseling

The Radius 360 Program includes **Virtual Mental Health Counseling**, offering 24/7 access to short-term, purposeful care through app, web, or phone. With mental health challenges affecting millions of individuals—4 in 10 adults in the U.S. have reported symptoms of anxiety or depression in recent years—our program ensures employees and their families have access to vital support at **no additional cost**.

This program is designed to address issues such as **Anxiety, Depression, Stress, Grief, Work and Family Concerns, and Substance Abuse**. All counseling is conducted by licensed professionals with Master's-level degrees or higher in fields such as counseling, social work, or psychology. Members have the option to request a specific counselor gender and are guaranteed continuity of care by collaborating with the same counselor throughout their experience. With this service, Radius 360 is committed to providing compassionate, accessible, and professional mental health care for you and your loved ones.

Ask AI

Unlock the power of super health intelligence at your fingertips 24/7/365! Our “ask anything” feature allows you to speak directly to the phone or upload a document for review. You will then be prompted to the most relevant information. Every response is pulled from a vast pool of the works health knowledge, but it is shaped by you, your data and what you choose to share.

Virtual Health Care On-Demand

Experience a smarter, more convenient way to manage your health with the **AI Doctor**—an innovative virtual assistant powered by advanced artificial intelligence. This tool analyzes symptoms, provides personalized medical advice, and recommends next steps for your health, all available 24/7 from the comfort of your smartphone or device.

Simply click the microphone and speak to your phone to receive immediate assistance, whether you're seeking guidance for minor concerns or more complex health issues. Additionally, you can securely share your health information with family members, doctors, or caregivers, ensuring they are informed and can provide the best care possible.

Personal Health Advisor

Every Radius 360 member is supported by the Personal Health Advisory service, providing personalized guidance to help you achieve better health outcomes. Whether you're managing a chronic condition, navigating a new diagnosis, or focusing on preventive care, this service is here to assist you every step of the way.

Our multi-disciplinary team of in-house experts collaborates with top medical facilities and specialists across the country to deliver exceptional support. **Services include:**

- **Second Opinions**
- **Medical Records Collection**
- **Medical Bill Negotiation**
- **Critical Diagnosis Support**
- **Initiative-taking Preventive Care Strategies**
- **Chronic Condition Management**
- **Support for Age-Related Health Issues**

With the Personal Health Advisor, you have access to a trusted partner who will simplify the complexities of healthcare and ensure you receive the best possible care.

3D Body Scan

With the Radius 360 Program, members who use Apple devices can access a **3D Body Scan** feature to measure, track, and monitor their fitness and health anytime, anywhere. By utilizing depth sensors already built into your device—like how your phone recognizes your face, the system captures thousands of data points to map the contours of your body. Complex algorithms then analyze this data to provide insights into your health metrics.

Our body imaging technology is designed to be safe for everyone, including pregnant women, and prioritizes your privacy. No photographic images are captured; instead, the system uses heat-mapping silhouettes in monochromatic (black and white) form, ensuring your security while delivering valuable health insights.

Real-Time Health Monitoring

Radius 360 members can access Real-Time Health Monitoring services that provide instant insights into their vital signs and health risks. By simply using the camera on your smartphone or other web-connected devices, you can quickly estimate key health indicators in under 30 seconds. This technology helps monitor and predict risks associated with chronic diseases, **including:**

- **Blood Pressure**
- **Cholesterol**
- **Diabetes**
- **Stress Index**
- **Irregular Heartbeat**
- **Cardiac Workload**
- **Post-Operative Care**
- **Skin Cancer Risks**
- **Blood Oxygen Levels**

With just the touch of a finger or a facial scan, you can measure metrics such as heart rate, respiratory rate, blood pressure, and stress levels. Radius 360's real-time health monitoring empowers you to stay initiative-taking about your health and make informed decisions with ease.

Digital Vital Signs – Track Your Health with Your Smartphone

Transform your smartphone into a powerful health monitoring tool with Digital Vital Signs, a feature that uses advanced sensors and AI technology to help you stay on top of your wellness. This innovative tool allows you to effortlessly **track key health metrics such as:**

- **Heart Rate**
- **Blood Pressure**
- **Blood Oxygen**
- **Heart Rate Variability (HRV)**
- **Respiratory Rate**
- **Stress Levels**
- **Cough Detection**
- **Tuberculosis Screening**
- **COVID Monitoring**
- **Spirometry**
- **Skin Health**
- **Sexual Health**

With real-time monitoring, you can track daily health trends or prepare for a medical check-up without the need for specialized equipment. Stay initiative-taking about your health anytime, anywhere, and gain valuable insights into your well-being with just a few taps on your smartphone.

Heart Rate – In Brief

Your heart rate, or pulse, is the number of times your heart beats per minute (bpm). For adults, a normal resting heart rate typically ranges from 60 to 100 bpm, but this can vary depending on factors such as age, fitness level, and stress.

- A **low heart rate** (bradycardia) is below 60 bpm.
- A **high heart rate** (tachycardia) is above 100 bpm.

Heart rate abnormalities may result from exercise, stress, medical conditions, or medications, making regular monitoring essential for understanding your cardiovascular health.

Blood Pressure – In Brief

Blood pressure measures the force of blood against the walls of your arteries as your heart pumps. It has expressed as two numbers:

- **Systolic pressure** (top number): The pressure in arteries when the heart beats.
- **Diastolic pressure** (bottom number): The pressure in arteries between beats.

Monitoring blood pressure is crucial for detecting high or low blood pressure, which can indicate underlying health issues.

Blood Oxygen – In Brief

Blood oxygen saturation (SpO₂) refers to the percentage of hemoglobin in your blood that is carrying oxygen. Hemoglobin is the protein responsible for delivering oxygen from your lungs to the rest of your body. Maintaining healthy blood oxygen levels is essential for overall health, and monitoring SpO₂ can help detect potential concerns early.

Respiratory Rate – In Brief

Your **respiratory rate** is the number of breaths you take per minute. For adults, a normal respiratory rate ranges from 12 to 20 breaths per minute. Variations in respiratory rate can be influenced by age, activity level, or health conditions. Tracking respiratory rate regularly provides insight into your lung function and overall health.

Heart Rate Variability (HRV) – In Brief

HRV measures the variation in time between each heartbeat and is a key indicator of cardiovascular health and autonomic nervous system function. A higher HRV suggests your body is better at adapting to stress and recovery, while a lower HRV may indicate fatigue, stress, or potential heart issues. Monitoring HRV alongside heart rate provides a more comprehensive picture of how your body responds to daily challenges and recovers from them.

Stress Level – In Brief

Using advanced AI, Radius360 scans your facial features to detect stress-related physiological changes such as:

- Skin color variations
- Pupil Dilation
- Eye movement
- Facial muscle tension

By analyzing these cues, the tool provides insights into your stress levels, giving you actionable data to help manage and reduce stress effectively.

Why Measure Respiratory Rate and Heart Rate Together?

Monitoring both **heart rate** and **respiratory rate** is essential because these two metrics are closely interconnected. The heart rate adjusts in response to changes in respiratory rate to maintain the body's oxygen supply and manage carbon dioxide levels.

- A high respiratory rate with a low heart rate may indicate respiratory distress.
- A high heart rate with a low respiratory rate may signal cardiovascular issues.

By analyzing both metrics, Radius360 provides a complete picture of your overall health and helps identify potential red flags early.

Why Monitor Heart Rate Variability (HRV)?

Radius360 AI does not just measure your heart rate—it also tracks your **HRV**, offering critical insights into how your body adapts to stress and recovers.

- **Higher HRV:** Indicates resilience, adaptability, and good cardiovascular health.
- **Lower HRV:** May signal stress, fatigue, or underlying heart issues.

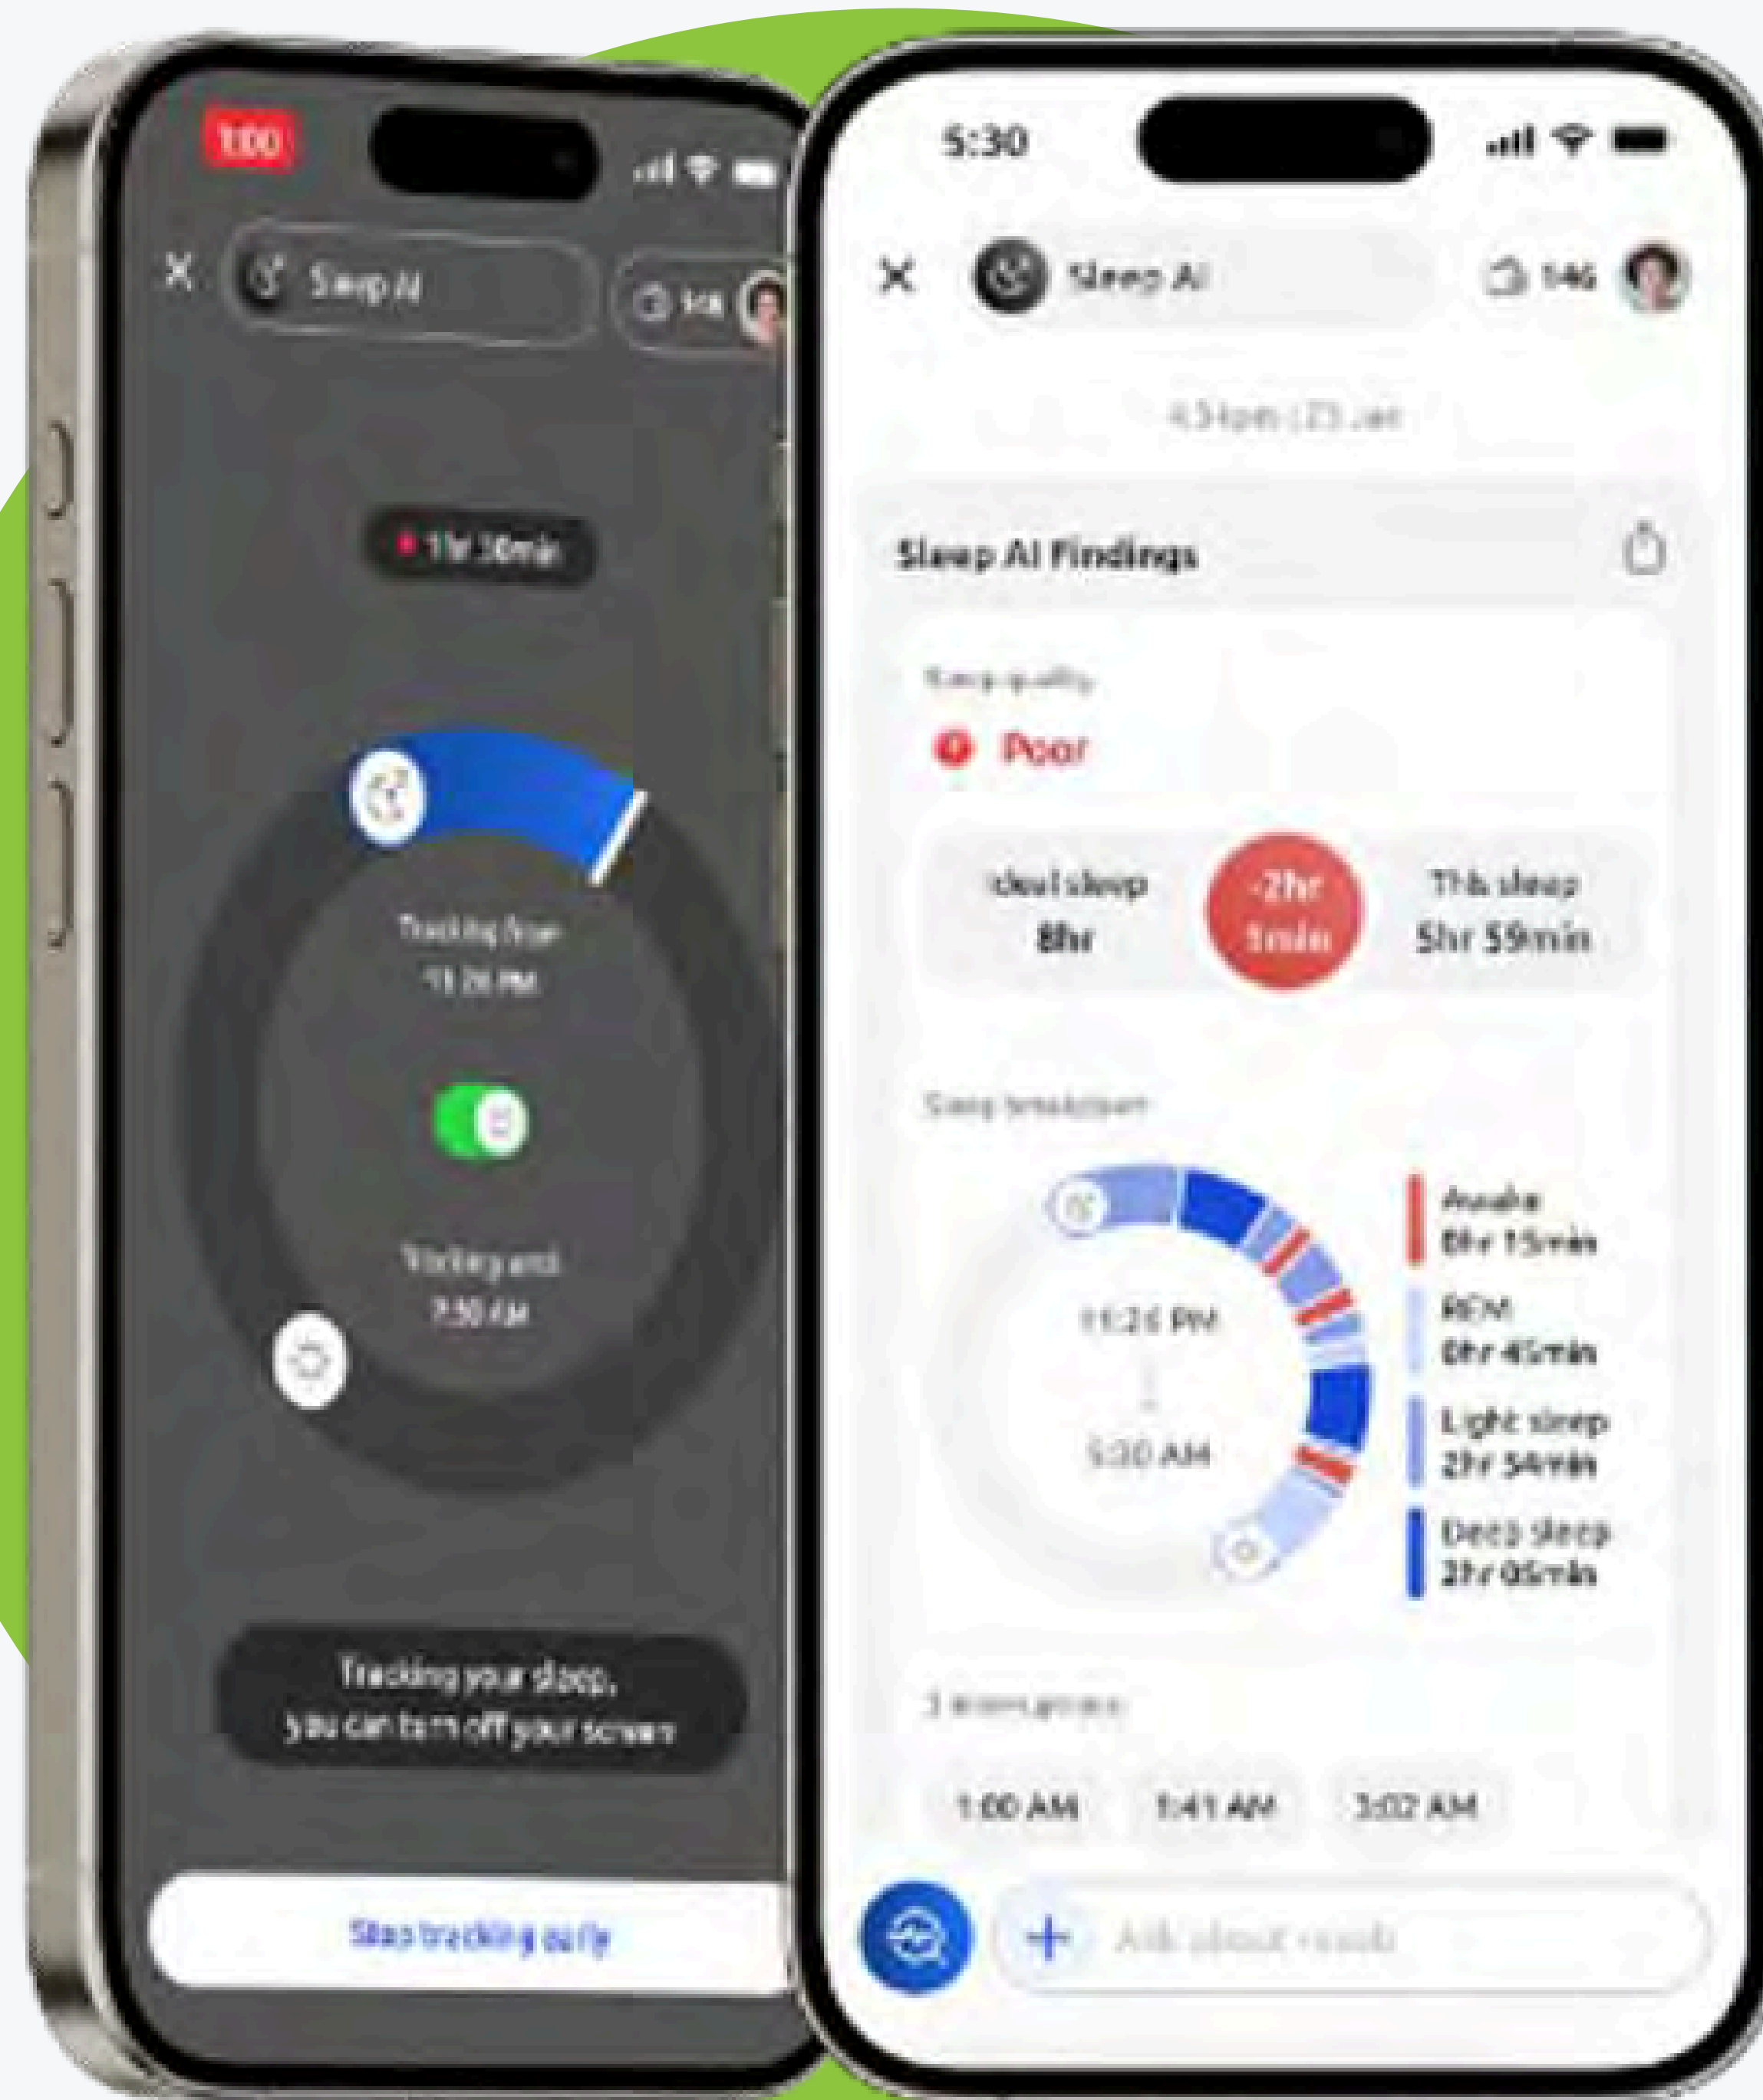

HRV monitoring helps you understand not just how fast your heart is beating, but how well it is functioning and responds to life's demands.

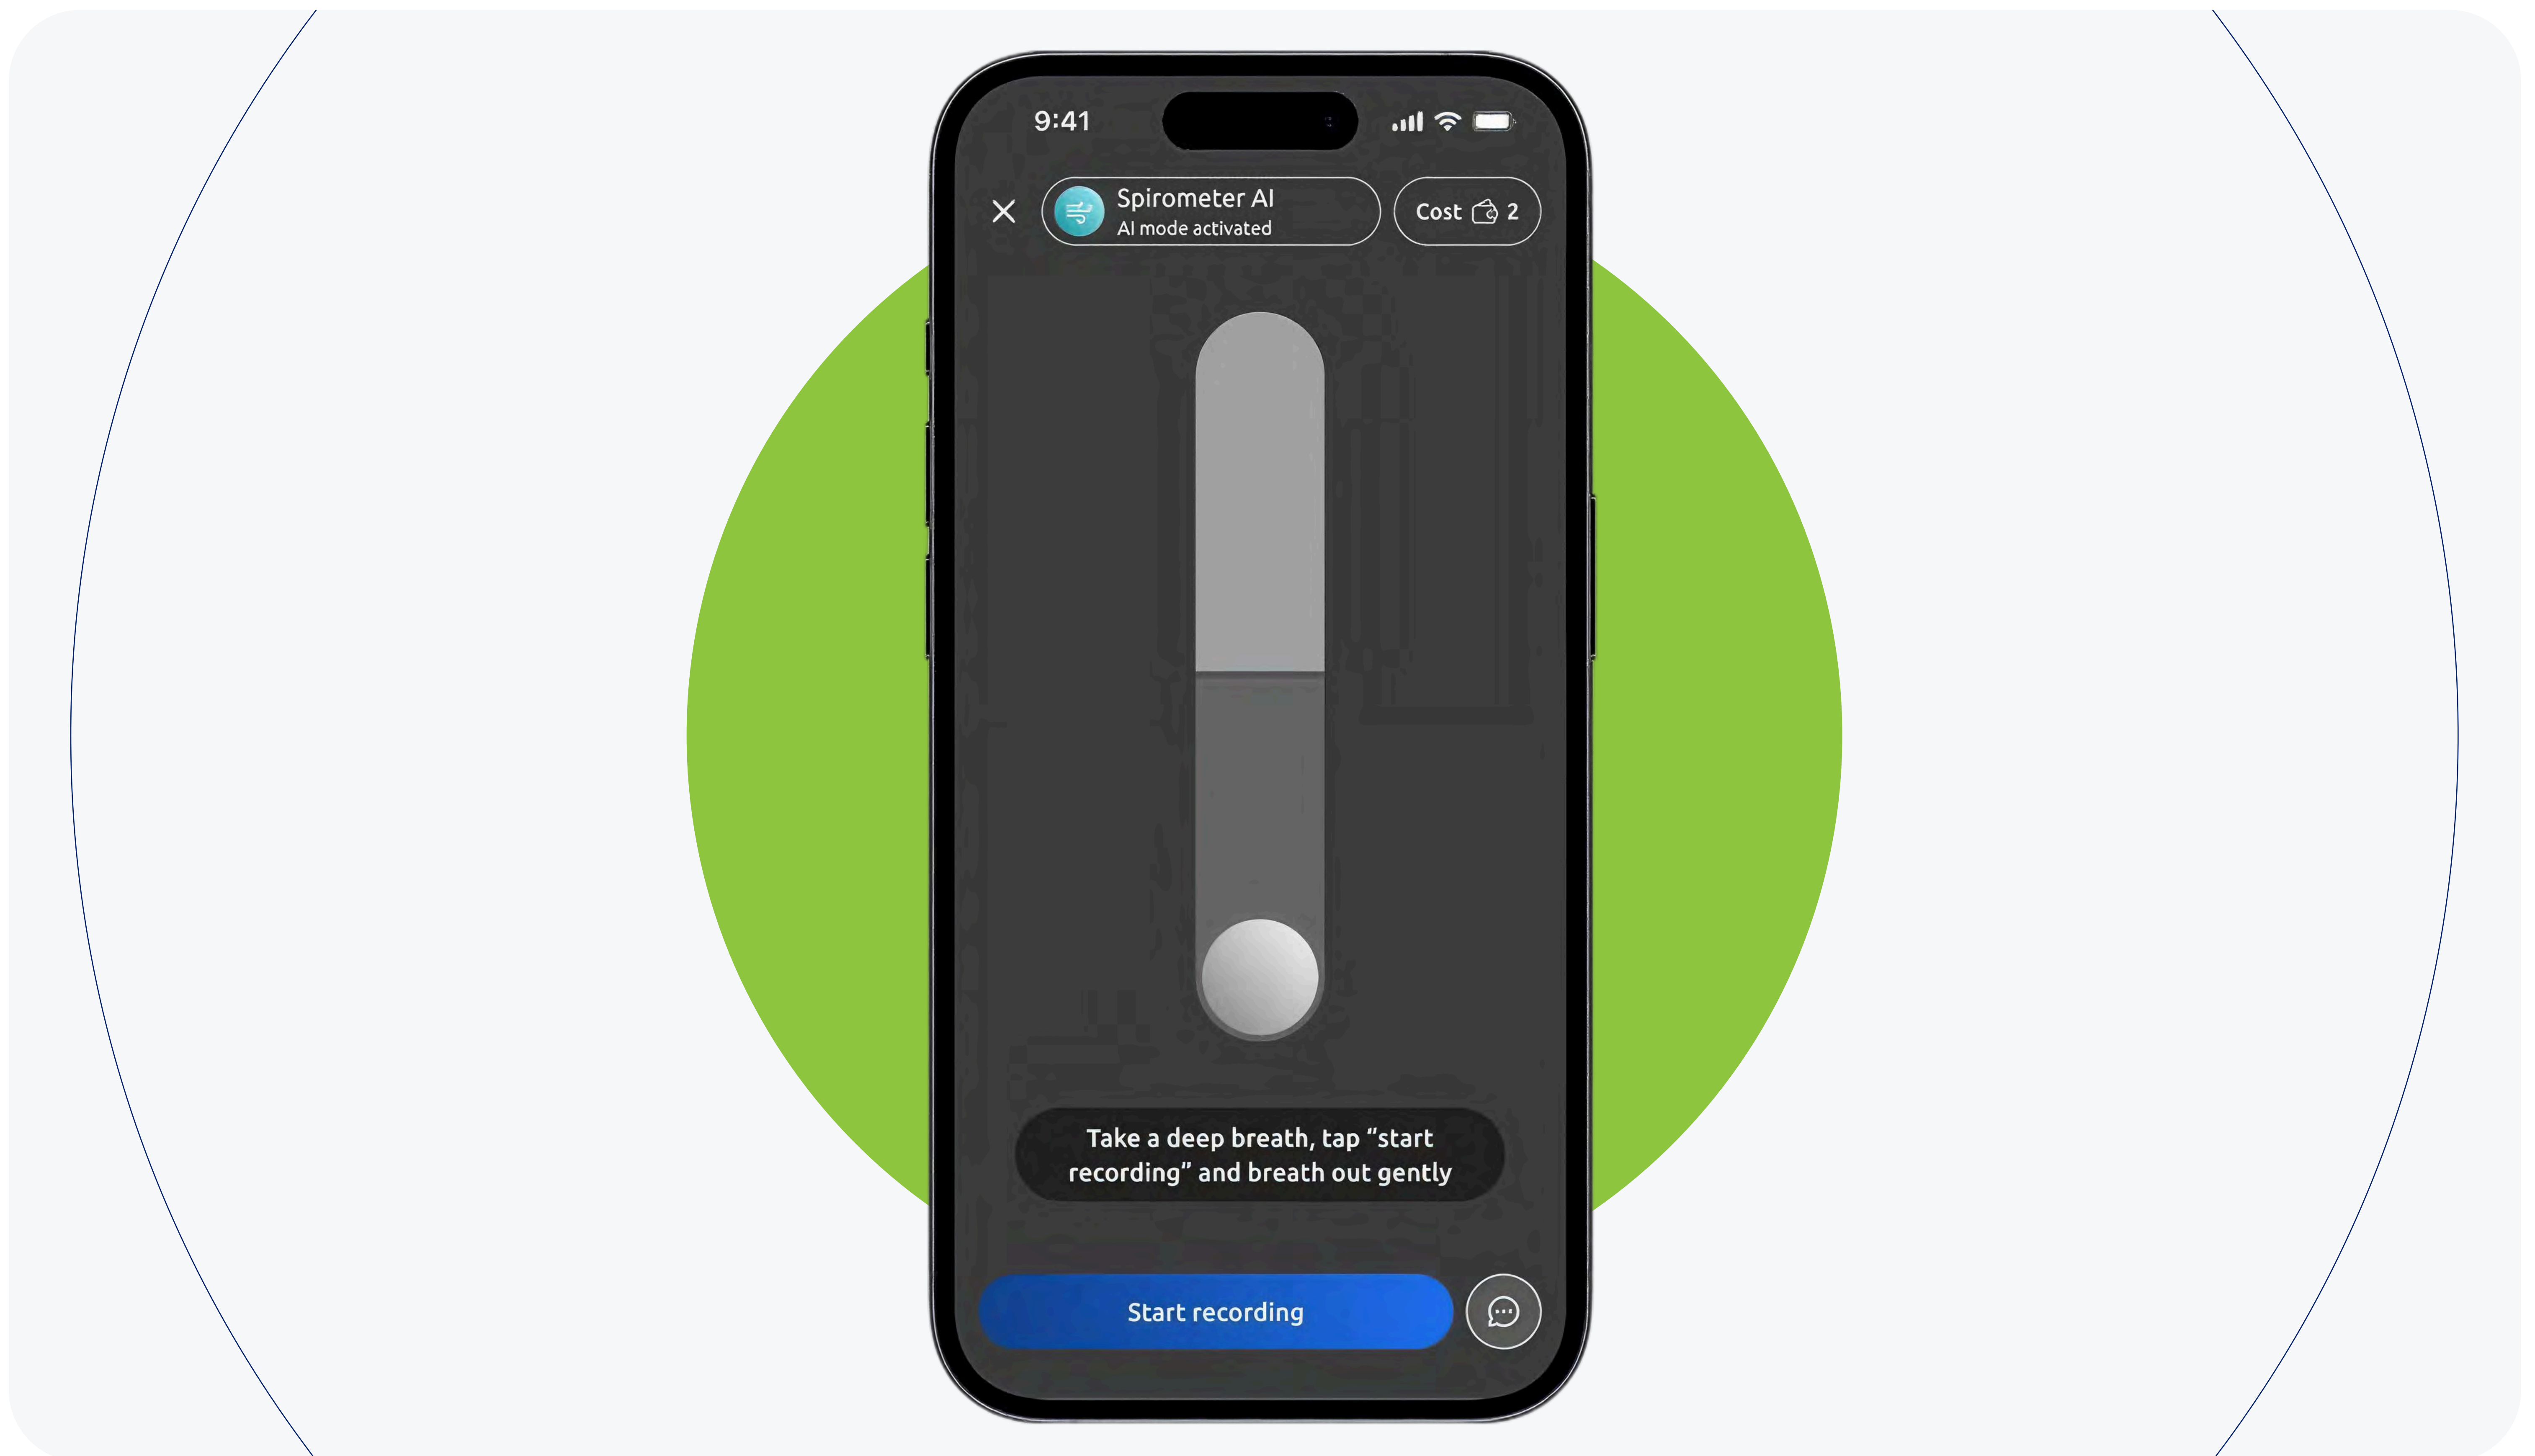

Why Check Blood Oxygen Levels and Heart Rate Together?

Blood oxygen and heart rate are deeply connected. A low blood oxygen level may cause the heart to pump faster to deliver more oxygen, while a high heart rate could reduce oxygen extraction efficiency. Monitoring both metrics gives a more accurate understanding of cardiovascular health, allowing Radius360 to provide a complete analysis for better health management.

Sleep Apnea Detection Coming Soon

Take control of your sleep health with our innovative **Sleep Apnea Detection** feature. By leveraging **digital spirometry** and advanced AI, we can detect abnormalities in lung function that may indicate **Obstructive Sleep Apnea (OSA)**. Through a combination of non-invasive BMI checks and our innovative Spiro AI, we monitor lung function decline to help identify mild to moderate OSA risk. The process is simple and seamless: activate **Sleep Mode** on your smartphone and place it on your bedside table before going to bed. While you sleep, AI algorithms analyze your breathing patterns in real-time, detecting sound variations that could signal potential sleep disruptions. Though this tool is not a replacement for traditional sleep studies or CPAP machines, it offers an affordable, accessible, and non-invasive option to promote better sleep, improved health, and enhanced well-being. Sleep smarter, live healthier.

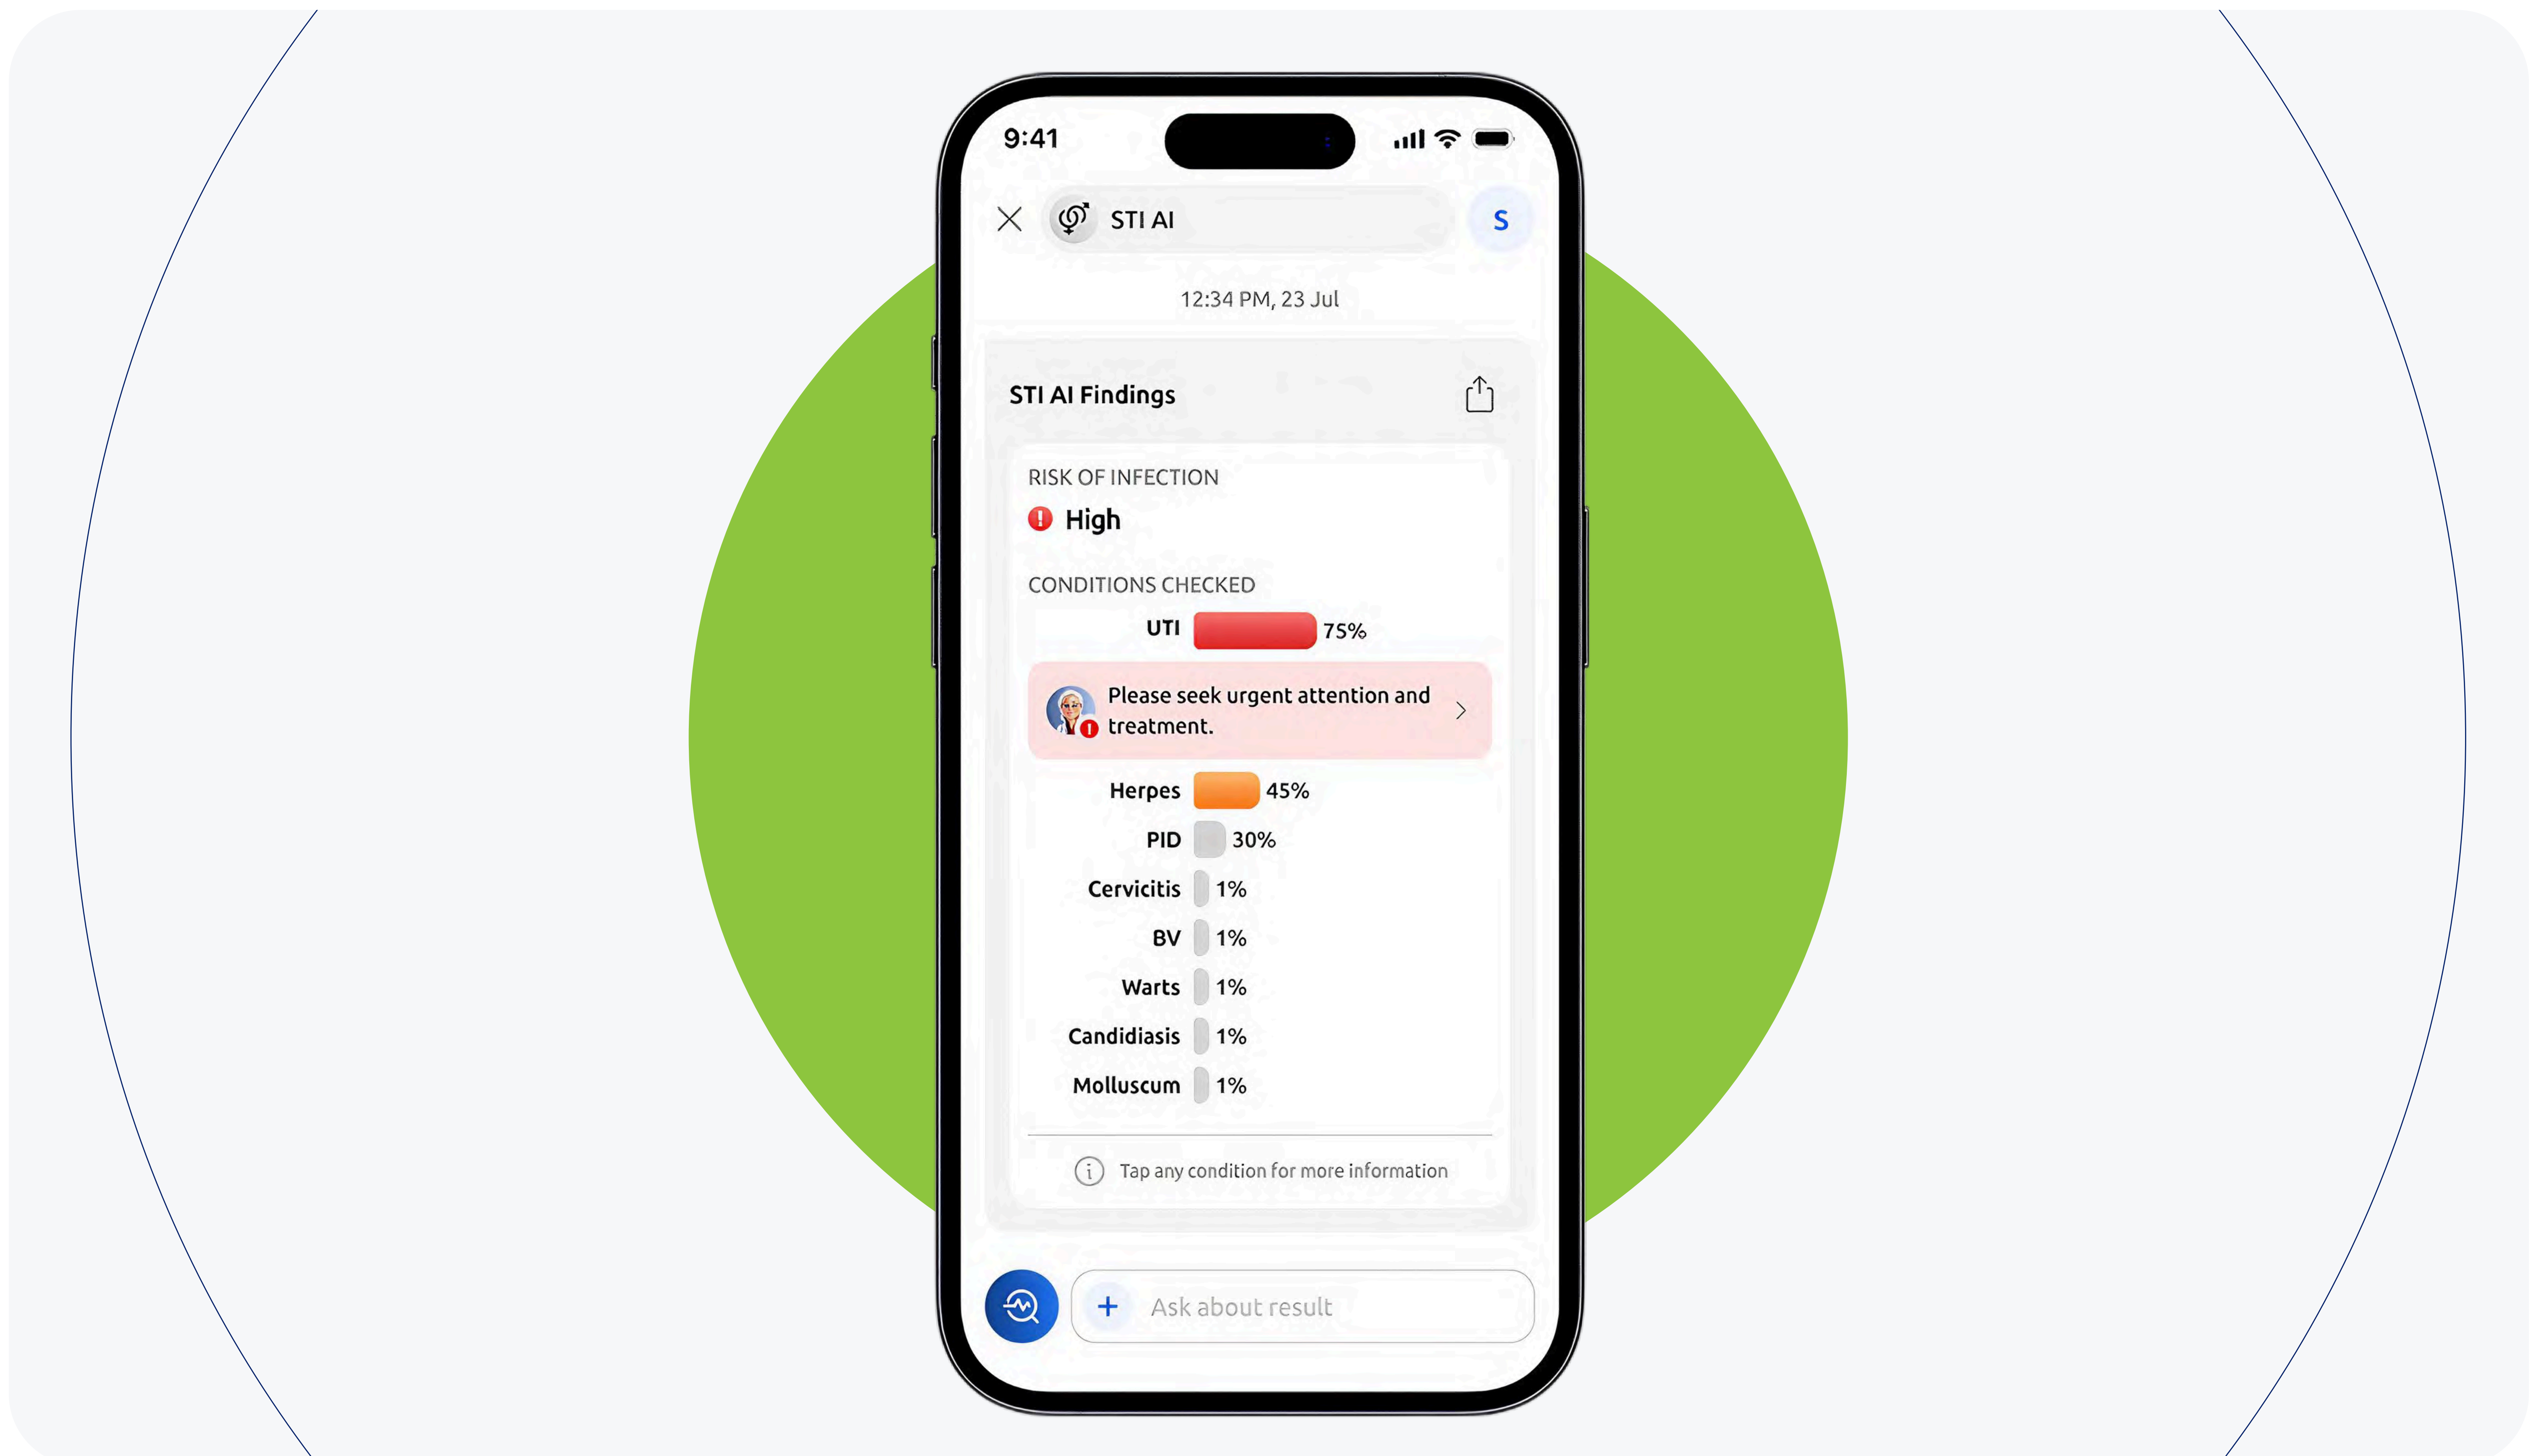

Lung Health Check – Breathe into Your Phone Coming Soon

With Radius360 AI, checking your lung health has never been easier. Simply breathe into your smartphone, and our advanced AI technology will evaluate your respiratory health to help identify potential lung conditions.

Originally developed during the height of the COVID-19 pandemic, our innovative **Cough AI** provided a non-invasive way to assess lung conditions. Building on that success, we have introduced **Spiro AI**, the world's first **digital spirometer**. This groundbreaking tool allows you to inhale and exhale into your smartphone's microphone to measure pulmonary function with precision. Additionally, **Spiro AI** includes built-in **incentive spirometry** features, making it a powerful tool for **pulmonary rehabilitation**. Whether you are monitoring your lung performance or supporting your recovery, Radius360's lung health tools represent the forefront of respiratory care innovation.

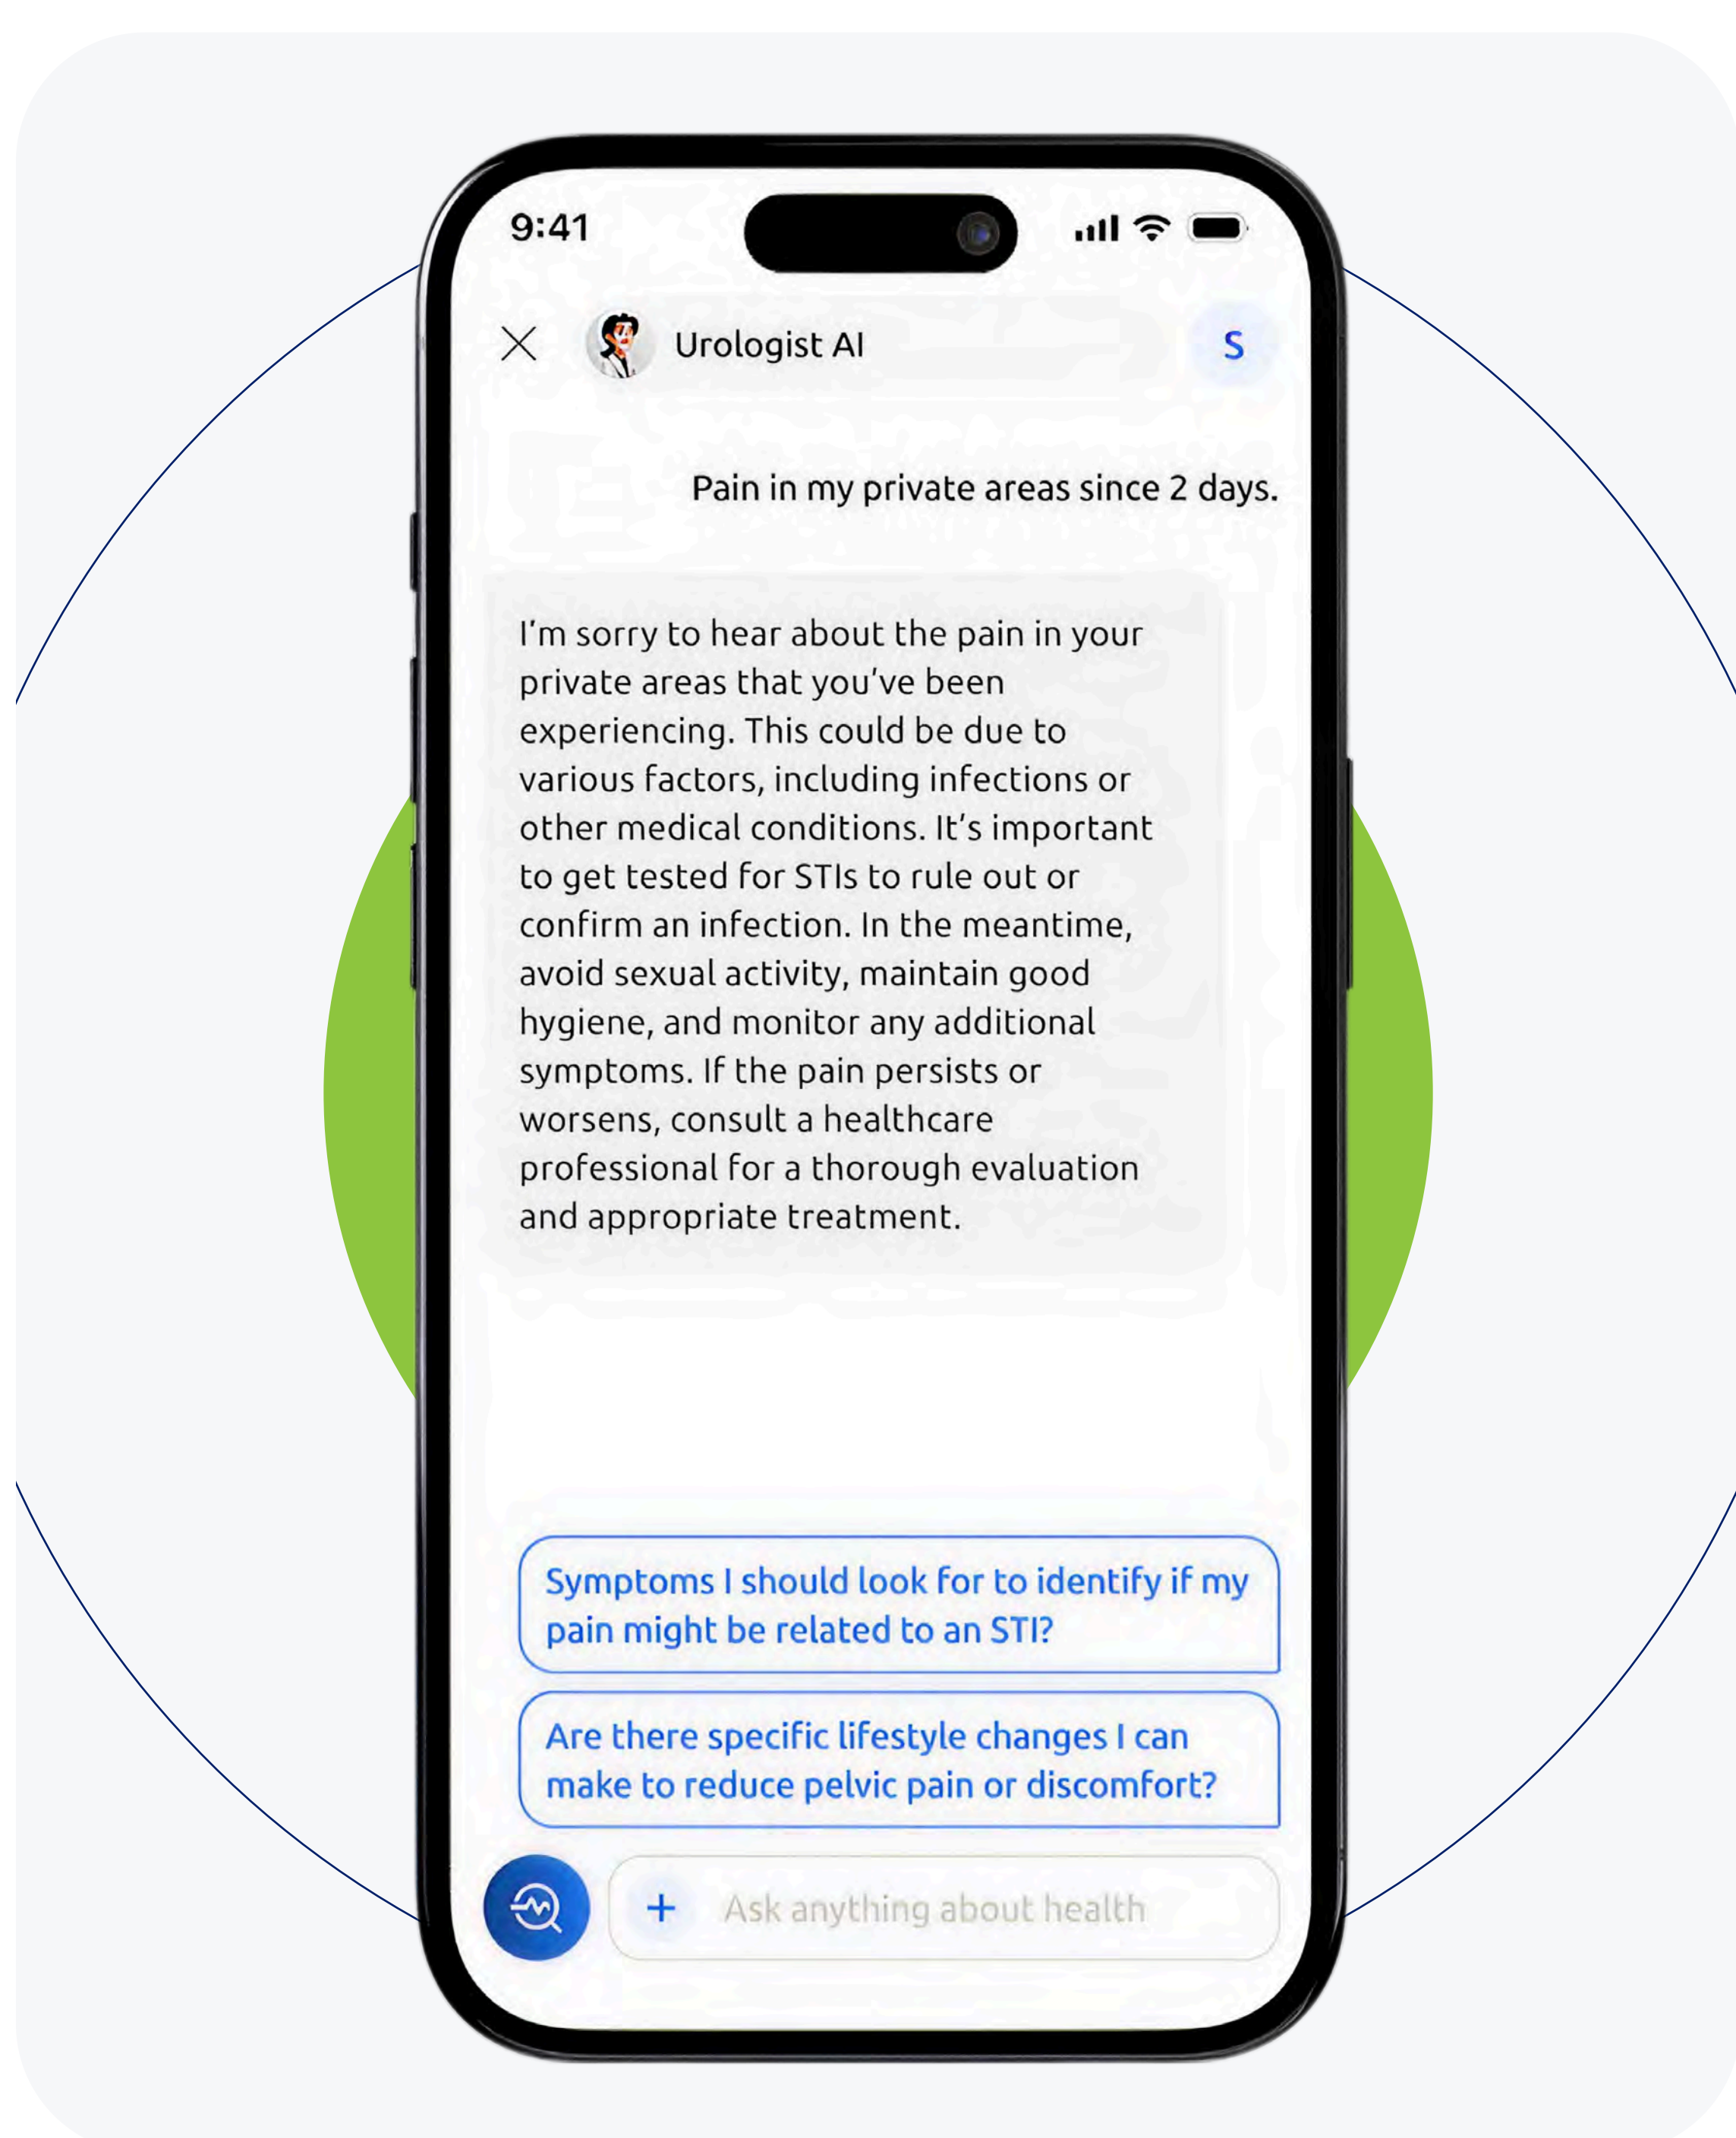

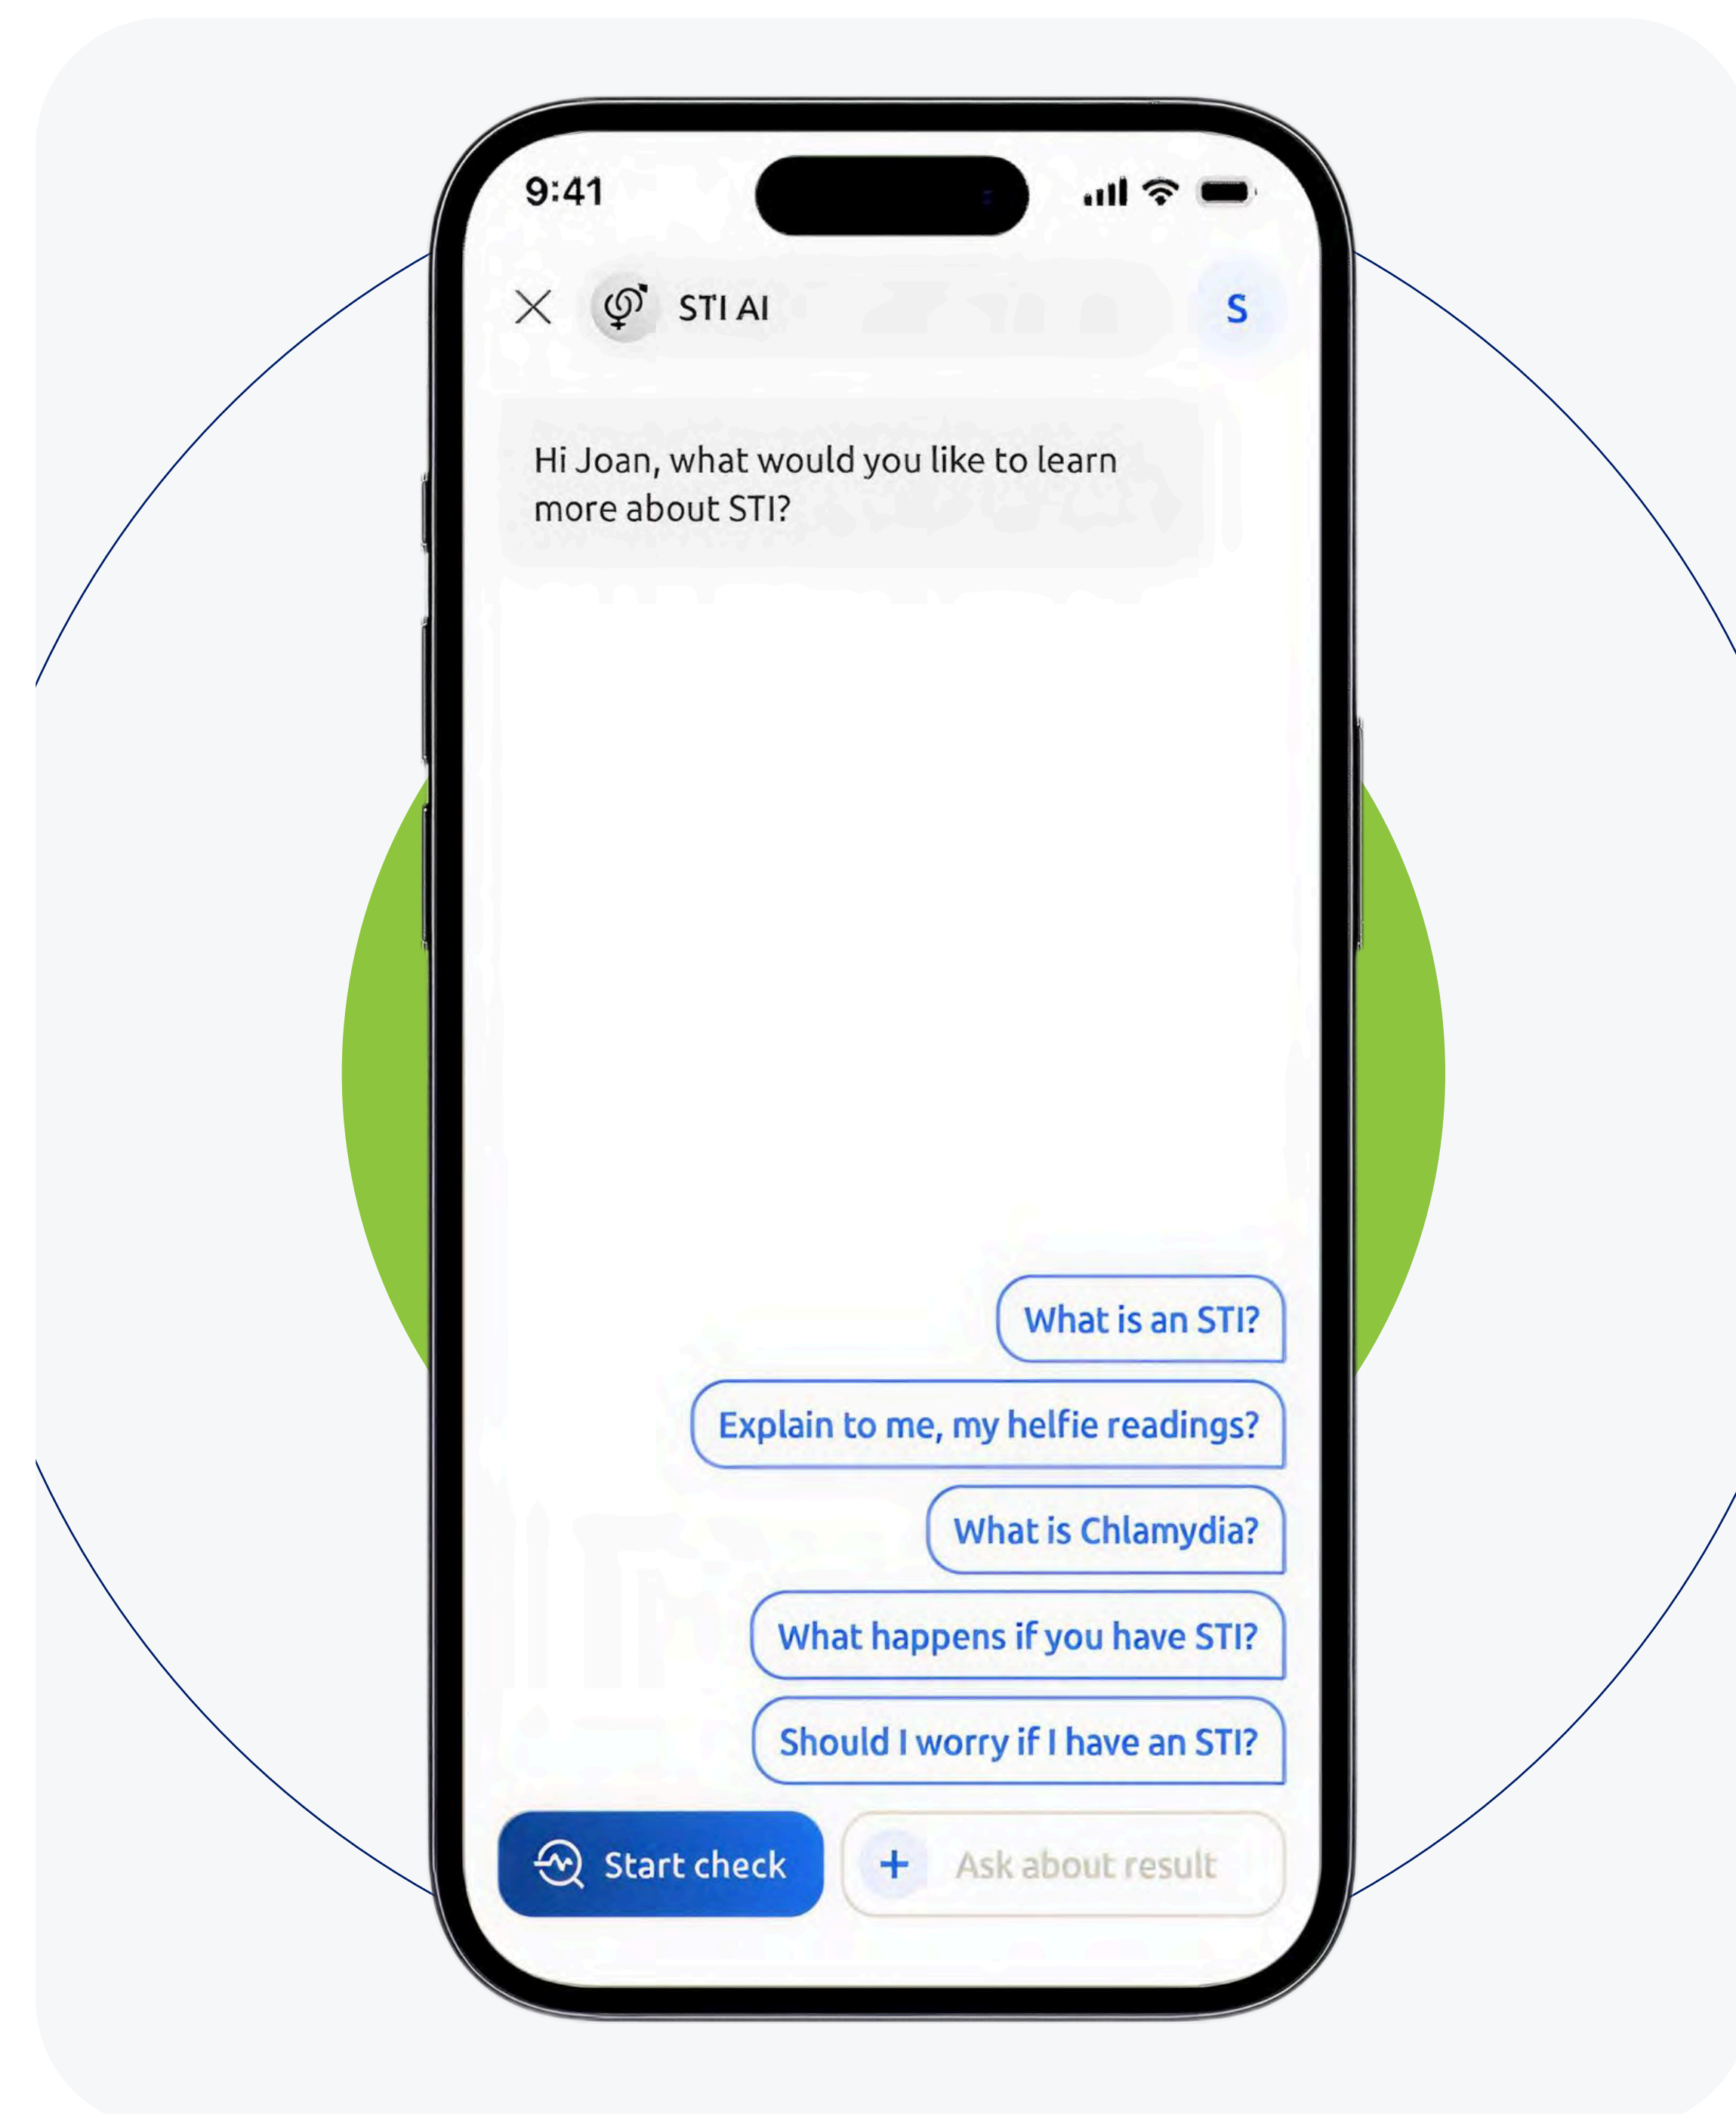

Quick STI Risk Assessment – Know in 60 Seconds

Radius360 AI offers a fast, accurate, and discreet way to assess your risk for sexually transmitted infections (STIs). Using **advanced machine learning**, Radius360 analyzes your responses to a brief series of targeted questions to provide a personalized risk assessment. The more honest and accurate your answers, the more precise the evaluation. Prefer a visual check? Simply upload a photo for analysis. Based on your input, Radius360 identifies the STI you may be at risk of contracting and provides a clear, easy-to-understand explanation of the potential condition. By analyzing multiple factors, this innovative tool delivers a **probabilistic assessment** of your risk, empowering you to make informed health decisions and take initiative-taking steps toward treatment or prevention. With Radius360 AI, STI checks are now more **accessible, efficient, and effective**, supporting better health outcomes for millions of individuals worldwide. Take control of your sexual health with confidence and ease.

Next Steps and Options at Your Fingertips

With Radius360's AI's STI Check, you gain access to a wealth of information and features tailored to help you make informed health decisions. Based on your AI-generated results, the platform provides clear next steps, empowering you with the tools and knowledge needed to take control of your health quickly and confidently

Ask Questions, Stay Informed

After receiving your AI result, you can continue your conversation with AI, which may even consult an AI to dive deeper into any medical condition. You will have the opportunity to ask detailed questions about how a specific condition might impact you, understand its health implications, and gain valuable insights tailored to your concerns. Feel free to ask any question, no matter how specific or personal—AI is a judgment-free algorithm designed to support you. Its sole purpose is to help you better understand potential health concerns, empowering you with the knowledge to make informed decisions about your well-being.

Prescription Drug Discounts

Save on your medications with Radius360's **Prescription Drug Discount Program**, offered in partnership with a leading national vendor. With rising costs due to high-deductible health plans, copays, and underinsurance, over 70% of Americans could reduce their expenses by using our prescription savings card. Members can save **up to 80%** on commonly prescribed medications and, in many cases, pay less than their current copay.

Accessing your savings is simple: open the **Prescription Discount** tab in the portal, display your QR code, and present it at participating pharmacies such as CVS, Rite Aid, Walgreens, Kroger, Walmart, Safeway, and more. With Radius360, affordable medications are always within reach.

At-Home Lab Tests with Consultation

To support preventive care and chronic condition management, the Radius360 plan provides members with access to one no-cost at-home lab test per year, including a telehealth consultation to review the results. Choose from a comprehensive list of tests, such as:

- **Adrenal Stress**
- **Cervical Cancer Screening (HPV)**
- **Colorectal Cancer**
- **Comprehensive Fitness (Male/Female)**
- **Food Sensitivity**
- **Heart Health**
- **HIV Testing**
- **Male/Female Fertility**
- **STI Panels (5 or 8 Panel)**
- **Thyroid Health**
- **Vitamin D**
- **Weight Loss (Male/Female)**

The kit is mailed at no cost and includes a prepaid return box for convenience. Once results are ready, members can schedule a teleconference with a healthcare professional to review findings. Members also receive a 20% discount on any additional tests they choose to order, all accessible through the Radius360 Portal.

Primary & Urgent Telemedicine

Radius360 members can access **24/7/365 telemedicine services**, connecting with U.S.-based, board-certified doctors via phone, website, or app. With an average time of under **6 minutes**, this service reduces waiting, absenteeism, and unnecessary out-of-pocket costs, providing fast and effective care. Common conditions treated include:

- **Cough, Sore Throat, Flu, Sinus Issues**
- **Skin Rashes, Bug Bites, Allergies**
- **Muscle or Joint Pain, Body Injuries**
- **Medication Refills**
- **Sexual and Reproductive Health**
- **COVID-19, STIs, Yeast Infections**
- **Toothaches, Gum Issues, Eye Issues**

No pre-registration is required, and the program boasts a **45% utilization rate**, ensuring that members receive timely and reliable care whenever they need it.

Fitness Tracker Integration

Stay on top of your health by synchronizing your fitness and health tracking devices to the Radius360 Portal.

Compatible with both Apple and Android devices, this feature allows you to track and monitor key health metrics, including:

- **Blood Pressure, Cholesterol, Weight, Blood Sugar, BMI**
- **Heart Rate, Body Fat, and Blood Oxygen**
- **Nutrition, Hydration, Fiber, and Caloric Intake**
- **Sleep Patterns (Time Asleep, Wakeups, Sleep Quality)**
- **Emotional Health (Stress, Meditation, Time Unplugged)**

Members can also participate in challenges and maintain personal health journals to stay motivated and achieve their wellness goals.

Wellness Challenges

Radius360 offers monthly **Wellness Challenges** to encourage healthy habits and friendly competition. Members can participate anonymously or alongside coworkers and other plan participants. Challenge topics include:

- **Step Contests**
- **Weight Loss Competitions**
- **Sleep Improvement Initiatives**

Join the fun, stay motivated, and work toward better health as part of the Radius360 community.

Cognitive Behavioral Trainings (CBTs)

Radius360 partners with leading national providers to offer a wide range of Cognitive Behavioral Trainings (CBTs) to support mental health and lifestyle improvements. Topics include:

- **Stress Management and Resilience**
- **Building Confidence and Motivation**
- **Healthier Lifestyles and Habit Creation**
- **Diet, Nutrition, and Healthy Weight**
- **Substance Abuse Support**
- **Managing Chronic Conditions (e.g., Diabetes)**
- **Quitting Tobacco and Nicotine**
- **Sleep and Stress Management**

These professionally taught and self-administered trainings are accessible **unlimitedly** through the Radius360 Portal, empowering members to take control of their health and well-being.

Personal Health Record (PHR)

Radius360 provides each member with an encrypted, Hi-Trust Certified **Personal Health Record (PHR)**. This secure platform allows members to store and share their **Personal Health Information (PHI)** with confidence, knowing it is protected by the highest levels of encryption. Store and organize important health details such as:

- **Emergency Contact Information**
- **Doctor's Office and Insurance Details**
- **Medical Records and Other Important Documents**

Your health information is always secure, easily accessible, and ready when you need it.

Smoking Cessation Program

Radius360 offers a professionally developed, self-guided Smoking Cessation Program to help members eliminate tobacco and vaping from their lives. This 10-part Cognitive Behavioral Training (CBT) series is designed to provide a step-by-step approach to quitting, with sessions that include:

- a. A Whole New Way (Introduction)**
- b. What is the Real Choice? (Orientation)**
- c. Do You Hear Yourself?**
- d. The ONE Reason You Smoke**
- e. Prepare for Your Breakthrough**
- f. Tell the Truth**
- g. Being the Boss**
- h. The Difference Between 99% and 100%**
- i. A Future Full of Possibility**
- j. Commitment Takes Character**

This program empowers members to make meaningful changes and build a healthier, smoke-free future with confidence and support.

Check Your Lungs by Coughing into Your Phone

With Radius360 Respiratory AI, monitoring your lung health has never been easier. Simply cough into your smartphone, and the AI will analyze your cough to assess your respiratory health and check for a range of conditions in just seconds. It is a fast, non-invasive way to stay informed about your lung health.

COMMON RESPIRATORY CONDITIONS MONITORED BY RADIUS 360°

Covid-19

Cough Profile 

Cough Symptoms Cough, Headache, Sore Throat, Body Pain, Fever +

Covid-19

A highly infectious respiratory disease caused by the SARS-CoV-2 virus. Symptoms include fever, cough, shortness of breath, fatigue, and loss of taste or smell. Early detection and preventive measures, such as vaccines and hygiene practices, can help reduce the spread.

Asthma

Cough Profile 

Associated Symptoms Wheezing, shortness of breath, chest tightness, and coughing

Asthma

A chronic condition characterized by airway inflammation and narrowing, leading to symptoms like wheezing, chest tightness, and shortness of breath. Triggers include allergies, pollution, and physical activity.

Pneumonia

Cough Profile 

Associated Symptoms Cough, shortness of breath, chest pain, fever, sweating, chills, fatigue, weakness, nausea, vomiting, diarrhea, confusion, changes in mental awareness

Pneumonia

A lung infection caused by bacteria, viruses, or fungi, resulting in inflammation and fluid buildup in the lungs. Symptoms include cough, fever, chills, and chest pain.

Covid-19

Cough Profile 

Cough Symptoms Cough, Headache, Sore Throat, Body Pain, Fever +

Tuberculosis (TB)

A bacterial infection primarily affecting the lungs, spread through airborne droplets. Symptoms include a persistent cough, night sweats, weight loss, and fatigue.

COPD
Chronic Obstructive Pulmonary Disease

Cough Profile 

Associated Symptoms Shortness of Breath, Persistent Wheezing, Difficulty Breathing, Phlegm.

COPD

A group of lung diseases that cause breathing difficulties, often due to long-term exposure to irritants like tobacco smoke or pollution. Symptoms include coughing, wheezing, and shortness of breath.

Asthma

Cough Profile 

Associated Symptoms Wheezing, shortness of breath, chest tightness, and coughing

Pneumonia

Cough Profile 

Associated Symptoms Cough, shortness of breath, chest pain, fever, sweating, chills, fatigue, weakness, nausea, vomiting, diarrhea, confusion, changes in mental awareness

Covid-19

Cough Profile 

Cough Symptoms Cough, Headache, Sore Throat, Body Pain, Fever +

Black Lung

Cough Profile 

Associated Symptoms Shortness of breath, cough, chest pain, fatigue, wheezing, and clubbing of the fingers.

Lung Health

Lung Profile

- Good Health
- Poor Health
- Medium Health

Interstitial Lung Disease (ILD)

A group of progressive lung diseases affecting the tissue around the air sacs, leading to coughing, wheezing, and difficulty breathing.

Bronchitis

Inflammation of the bronchial tubes caused by infection or environmental factors such as pollution. Symptoms include coughing, chest pain, fatigue, and fever.

Croup

A common childhood illness causing inflammation of the upper airway, resulting in a barking cough, difficulty breathing, and a high-pitched sound when inhaling.

Black Lung

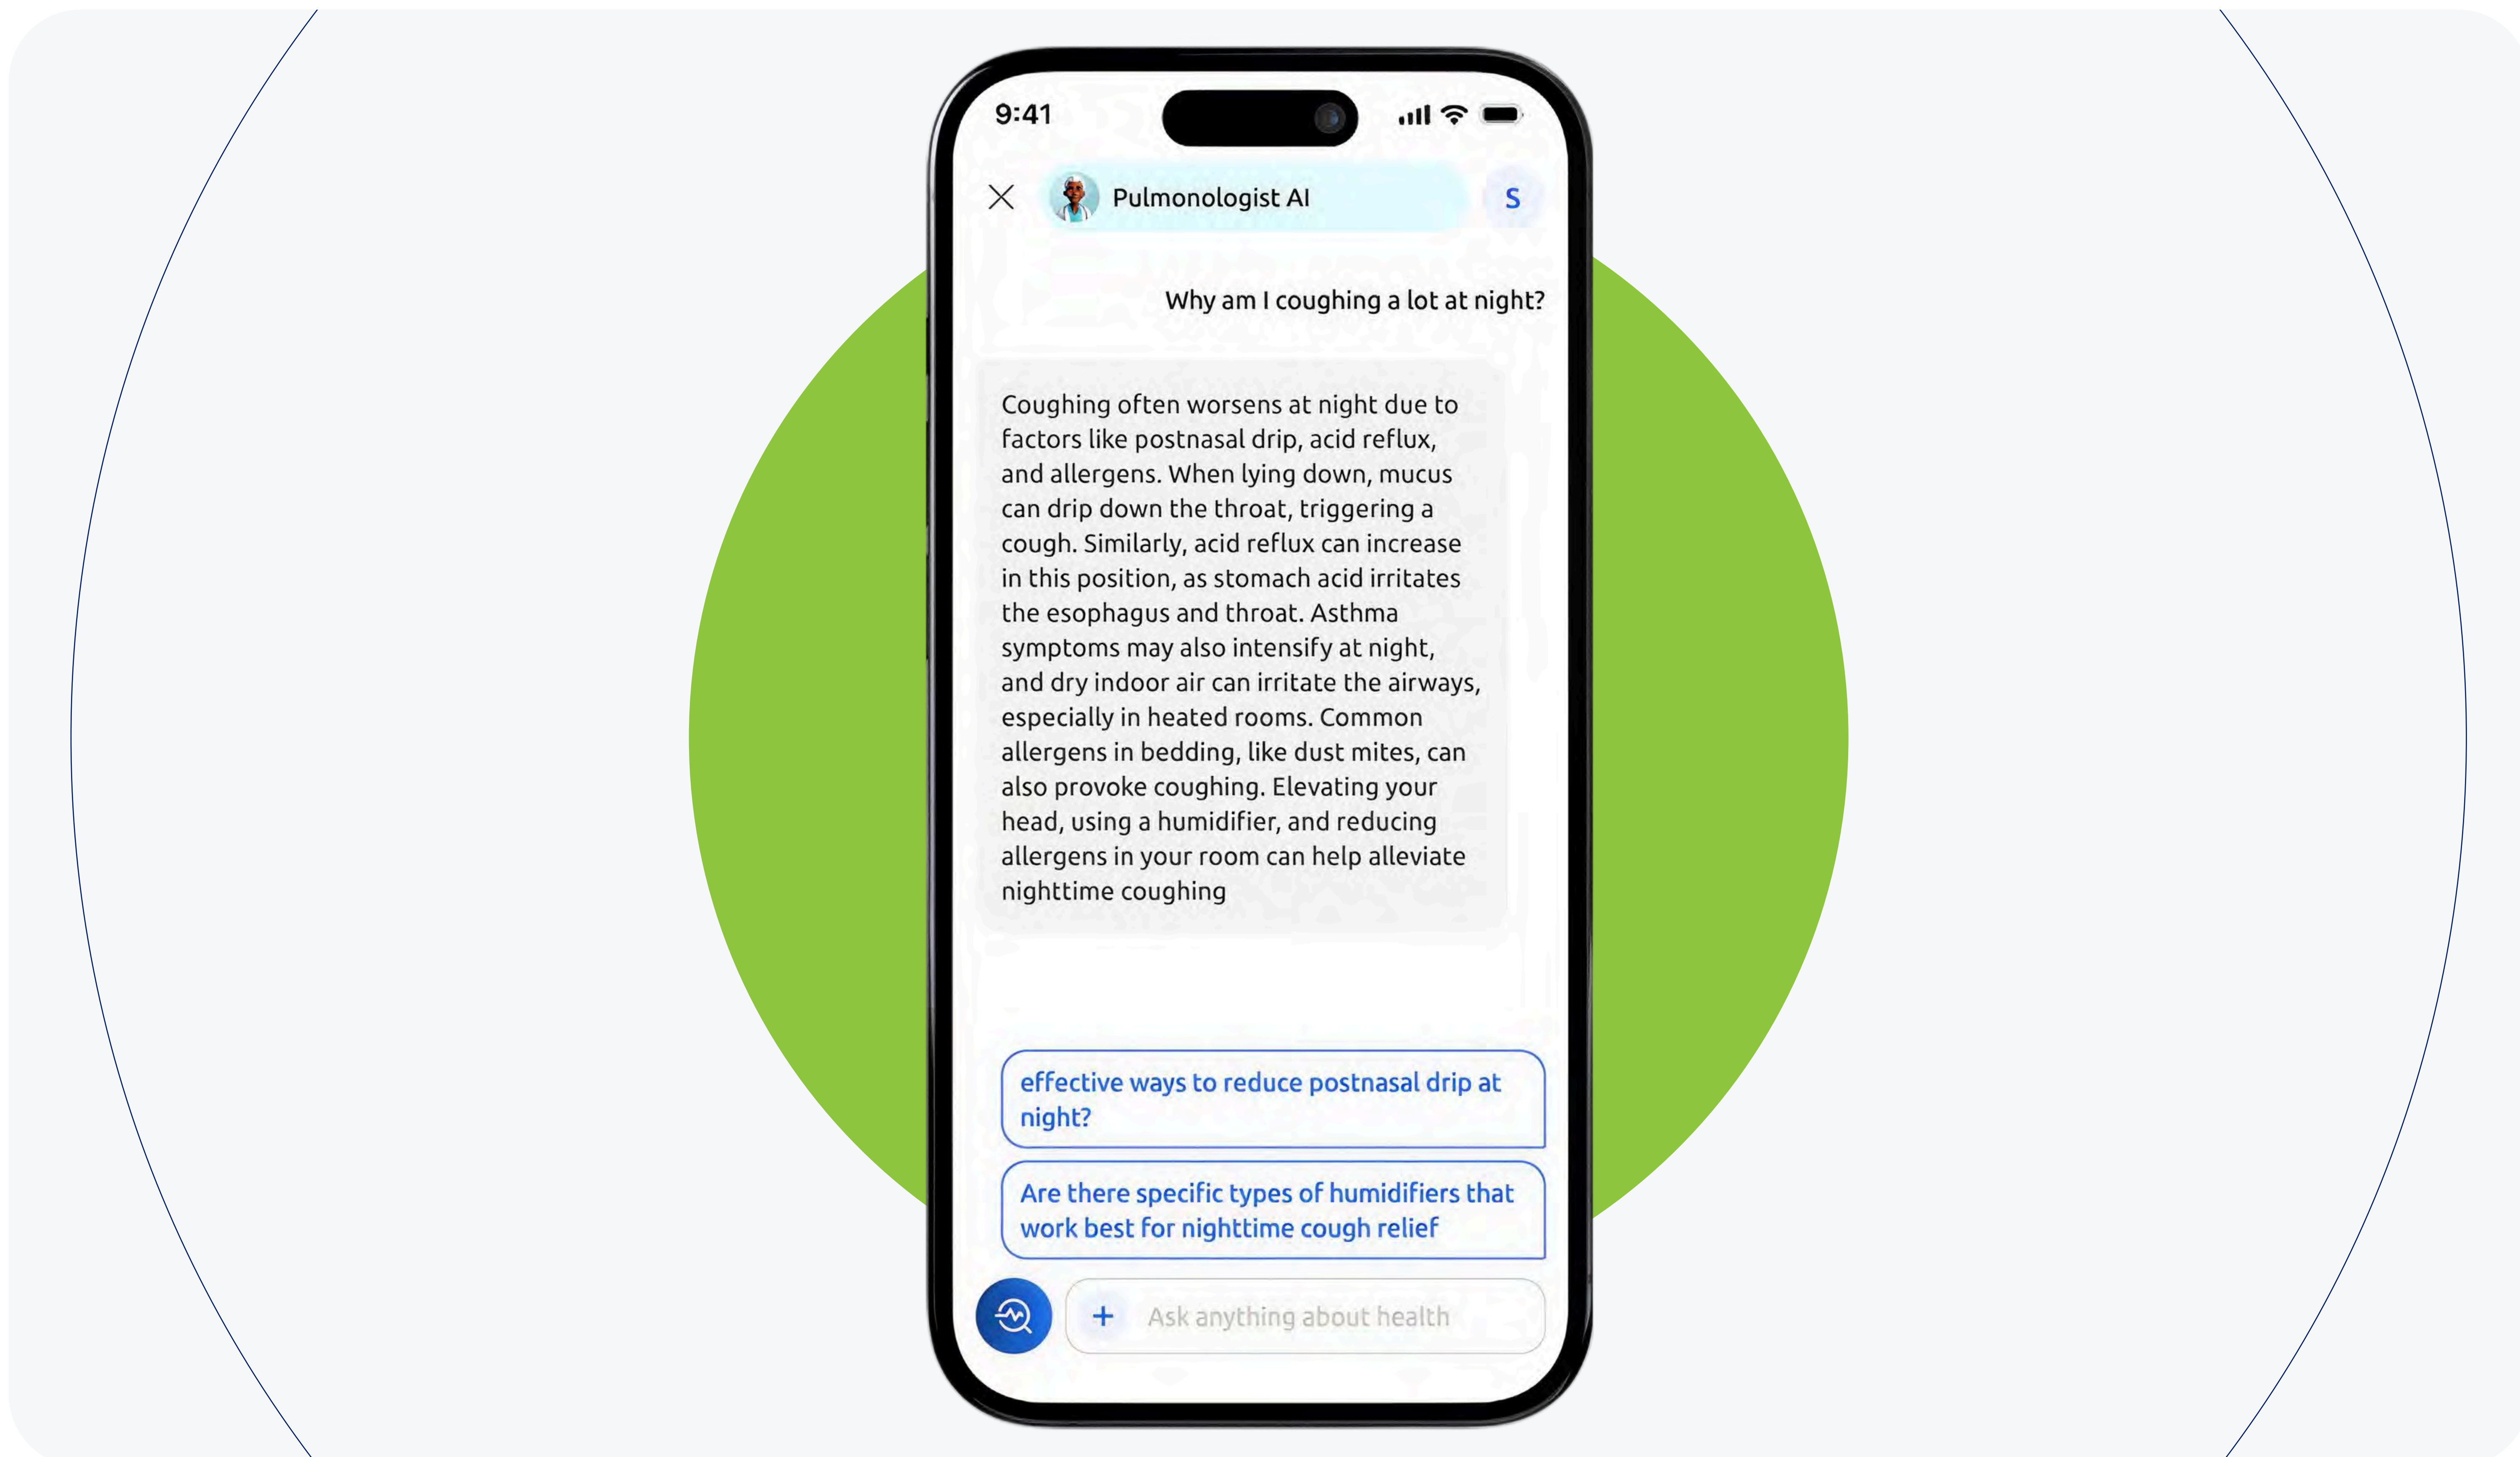

A lung condition caused by prolonged inhalation of coal dust, often seen in coal miners. Symptoms include coughing, shortness of breath, and chest pain.

How Radius 360° Analyzes Your Cough

Radius360 evaluates your cough to determine the overall health of your lungs. Based on the analysis, your lung health is classified into one of three categories:

- **Good Health**
- **Medium Health**
- **Poor Health**

Rest assured, not all coughs are connected to serious conditions. If your cough is determined to be normal, Radius360 will let you know.

Pulmonologist AI Mode – Tailored Expertise at Your Fingertips

Radius360's Pulmonologist AI Mode is your personal respiratory specialist, providing detailed, tailored insights into your lung health. Whether you are managing asthma, COPD, or simply having questions about your respiratory system, this AI-powered tool delivers precise information based on your unique circumstances.

Unlike generic search engines, Radius360 offers clarity without the clutter. The AI listens to your questions, learns your concerns, and delivers actionable, easy-to-understand answers. No more wading through medical jargon or irrelevant results—just clear, informed insights to help you make confident health decisions.

AI for Population-Wide Health Checks

Radius360 AI makes it easy for enterprises, governments, and healthcare organizations to implement automated health assessments for large groups. By enabling early detection and intervention, the platform supports better health outcomes on a population-wide scale. Key Features:

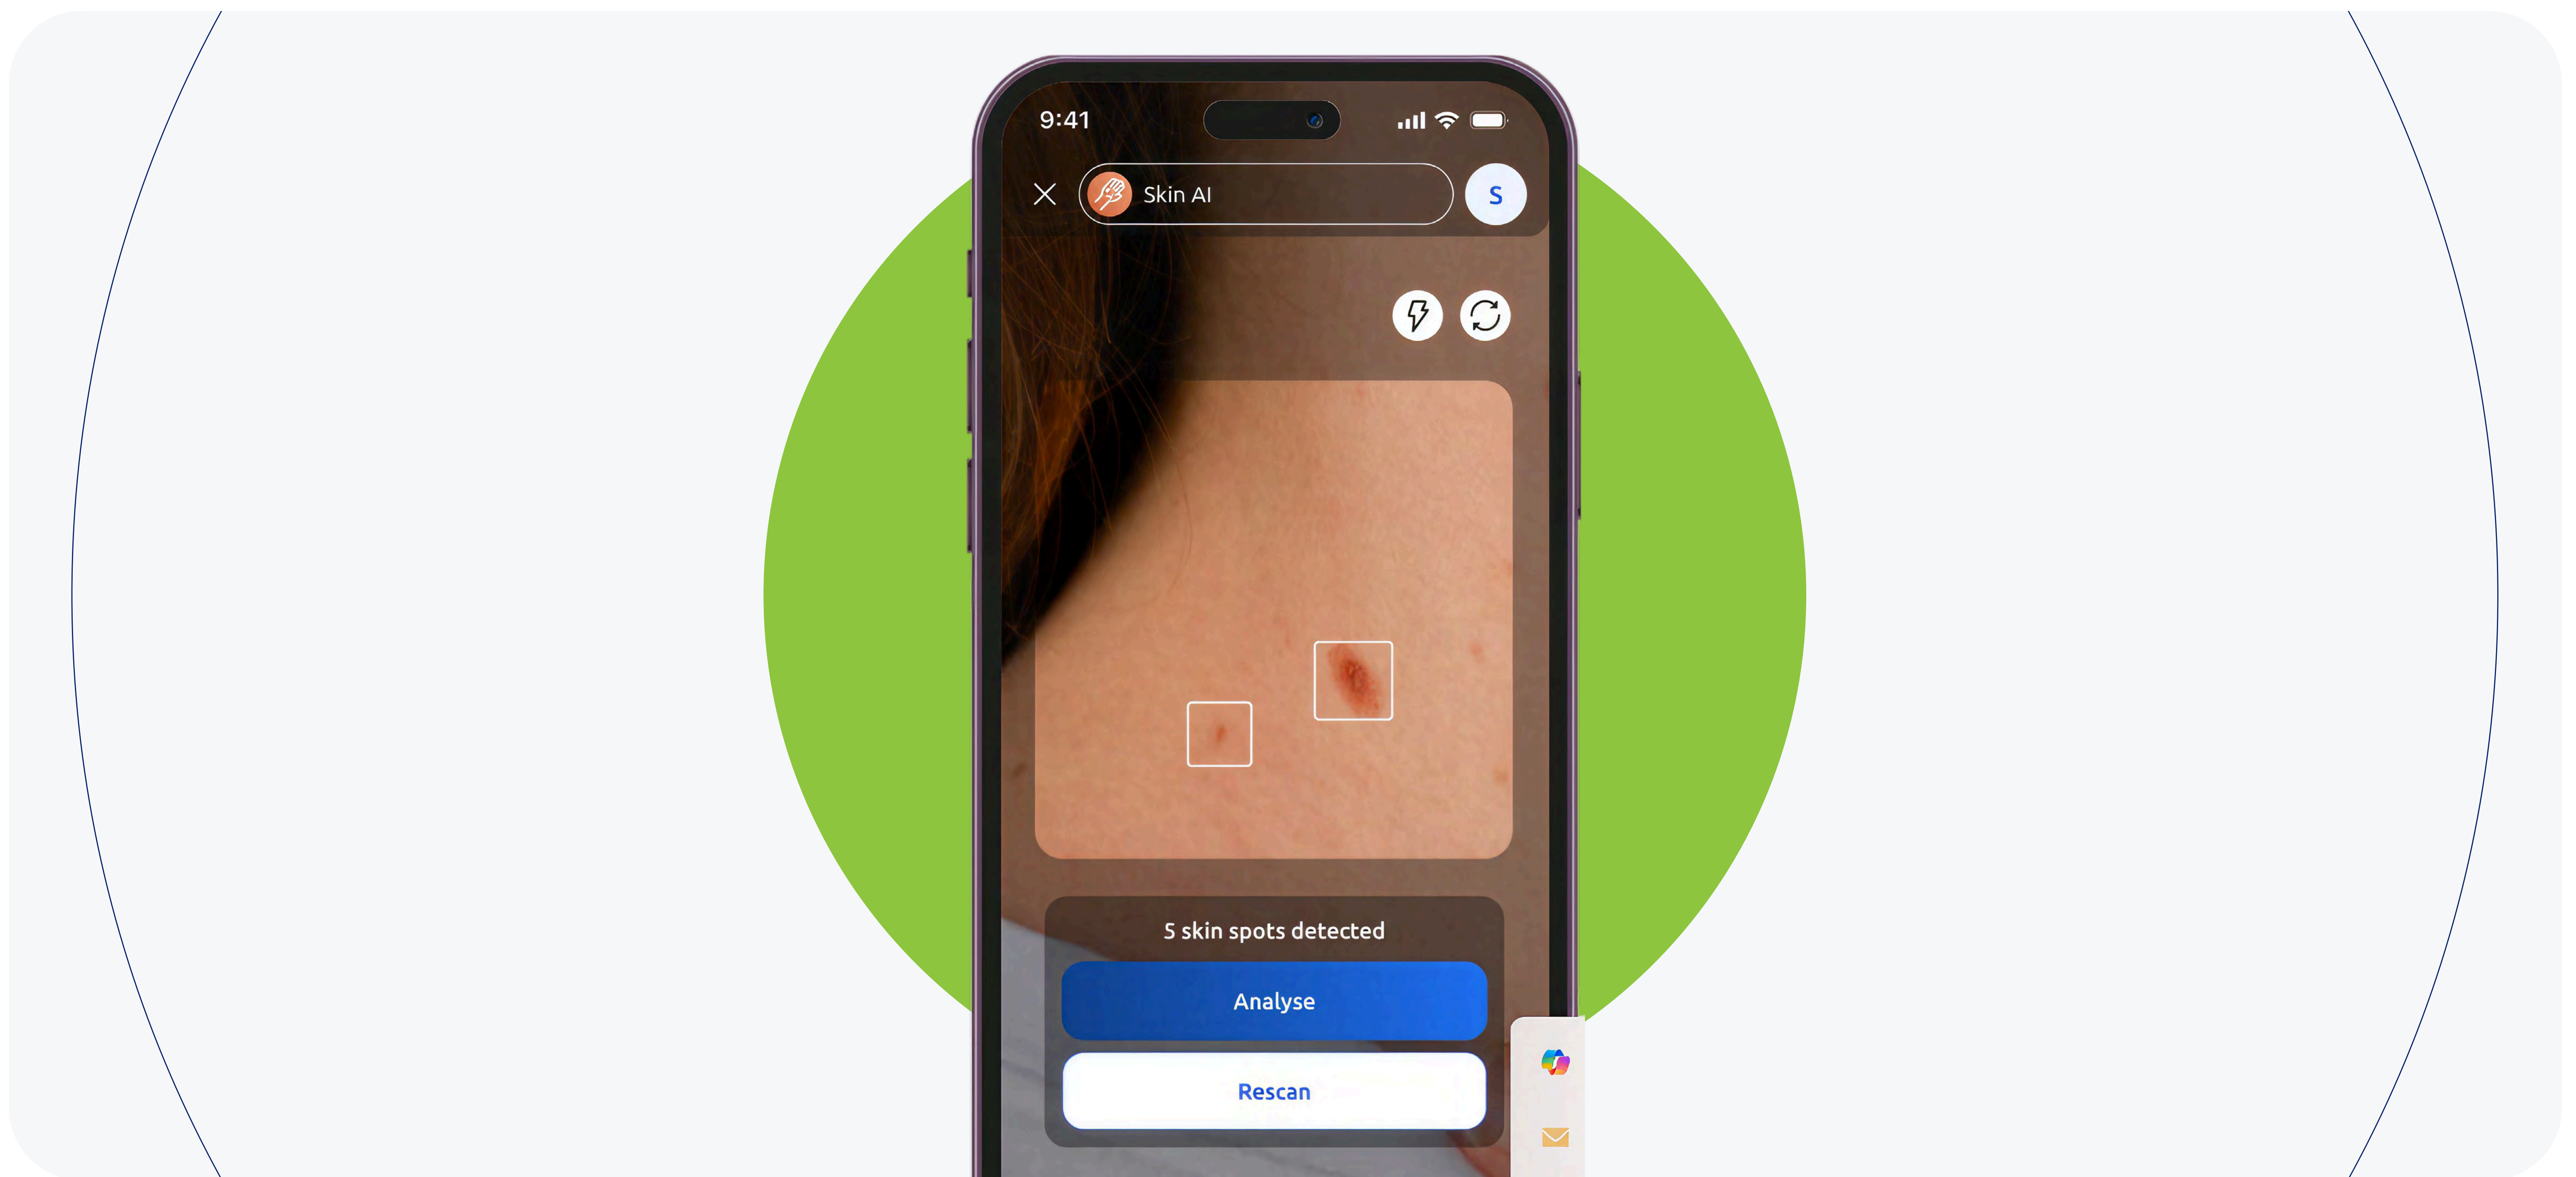

- **Health checks for staff, communities, and populations**
- **Customizable assessments to meet specific needs.**
- **Distribution across digital channels for accessibility**
- **Real-time monitoring of results and responses**
- **Integration into existing products and services**
- **Compliance with data protocols and security standards.**

With Radius360, health assessments are streamlined, scalable, and effective, ensuring better health management across entire populations.

Radius360 AI Skin Checks – Take a Picture, Know Instantly

Radius360 AI Skin Checks provide an easy, instant, and affordable way to monitor your skin health. Simply take a picture of a lesion, and the AI will analyze it to determine if it is low, medium, or elevated risk for skin cancer.

Why Skin Checks Matter

Skin cancer is the most common cancer worldwide, with over 9.9 million new cases each year. Early detection is critical, as skin cancer is highly treatable in its preliminary stages but can be life-threatening if left undiagnosed or untreated. The three primary types of skin cancer are:

- **Basal Cell Carcinoma:** The most common and least severe form.
- **Squamous Cell Carcinoma:** Less common but more aggressive than basal cell carcinoma.
- **Melanoma:** The least common but most dangerous, accounting for many skin cancer-related deaths.

Risk Factors:

- UV exposure from the sun or tanning beds
- Fair skin or a family history of skin cancer
- Weak immune system

Radius360 empowers you to **regularly monitor lesions**, ensuring early detection and peace of mind.

WHY CHOOSE RADIUS 360° AI?

Radius360's health monitoring tools offer innovative, real-time solutions for managing respiratory and skin health. With its user-friendly design, advanced AI, and actionable insights, Radius360 delivers the knowledge and support you need to stay initiative-taking about your well-being—anytime, anywhere.

Health Intelligence

Ask AI

Type, talk or upload documents of files for analysis. **Ask Anything.**

LET RADIUS360 DO THE WORK FOR YOU

Transition Between General and Specialist Health

With Radius360, you do not need to worry about choosing the right specialist. As you interact with the platform, it automatically shifts between General Health Mode, where you can ask any health-related question, and Specialist Mode, which delivers laser-focused insights on specific health topics. Radius360 ensures that the right expertise finds you, creating a seamless experience that adapts to your needs and priorities.

World-Class Health Knowledge Meets Your Data for Unmatched Insights

Every response in Specialist Mode is drawn from an extensive database of the world's health knowledge, but it is customized specifically for you. Radius360 tailors its advice based on your questions, shared data, and personal preferences, ensuring that the insights are relevant and actionable. The more Radius360 learns about your health, the more precise and personalized its recommendations become. It is not just generic advice, it is your health, your data, and your solutions, delivered with unmatched accuracy and care.

Personal Health Record (PHR)

Radius360 provides each member with an encrypted, Hi-Trust Certified **Personal Health Record (PHR)**. This secure platform allows members to store and share their **Personal Health Information (PHI)** with confidence, knowing it is protected by the highest levels of encryption. Store and organize important health details such as:

- **Emergency Contact Information**
- **Doctor's Office and Insurance Details**
- **Medical Records and Other Important Documents**

Your health information is always secure, easily accessible, and ready when you need it.
